

## Brett Louden

Fisheries Technician

NSW Department of Industry/ Department of Primary Industry

**Brett Louden** has worked as a Fisheries Technician for Fisheries NSW for more than 20 years. His service to the department and the community has been outstanding and his dedication to the job has led to world recognised research projects being implemented in NSW. He has been responsible for the deployment, maintenance and data management for the South East Australian Coastal Acoustic Monitoring System (SEACAMS) and has played a critical role in tagging Grey Nurse and Great White Sharks in NSW coastal waters and in underwater stereo-video photogrammetric surveys. Brett's experience has enabled the research scientists to concentrate on the science whilst leaving project management and project execution to his very capable skills.
